

# Juan David Avendano Ariza

Event Staff

I am a student in the Computer Programming Program (CPP). I am currently finishing the second semester of my four semesters. I am writing this letter because during these last two academic terms I have learned about the work ethic of SSF from some friends who have worked with you in the past. And I have received very good references and feedback. The idea of being able to work on campus, meeting people from different parts of the world, learning, showing, and respecting the different cultures that are on our campus is definitely an experience that I would love to live.

I am a very warm person who loves interacting with other people, always willing to help to make my environment and my workplace an enjoyable place to work. I strongly believe that my good communication and coordination would be of great help in the organization of the different events that take place every year in order to connect the college community. In addition, I can also contribute the knowledge that I have been learning throughout my course in the creation and improvement of our information dissemination through our digital platforms so that each time the events manage to have more participation from our community.

I'm very interested in learning more about the position and would welcome the opportunity to meet with you to discuss it further. In the meantime, I'd like to thank you for your consideration and invite you to contact me about the opportunity at any time.

Kind regards

To  
Seneca Student  
Federation
